With Ripple Fiber's Price for Life guarantee, you'll never have to worry about increasing internet prices.

The price you sign up for is the price you pay — for as long as you remain a customer.

1 Gig Plan: Secure your service at **\$85/month – for life**

2 Gig Plan: For a limited time, lock in **\$95/month for life**

This guarantee applies to your internet package only and doesn't cover optional add-ons or equipment.

RIPPLE FIBER

Ripple Fiber: White Glove Installation Policy

Pre-Arrival Call: We will contact you when we're on our way so you'll know exactly when to expect us.

Service Awareness: Before we arrive, our technician will already know the services you've ordered, so there's no need to ask you again.

Respectful Entry: As soon as we enter your home, our technician will put on boot covers to keep everything clean and tidy.

Initial Assessment: We'll start by checking the Network Interface Device (NID) and then discuss with you where you'd like the Optical Network Terminal (ONT) to be located.

Installation Path Plan: Our technician will walk you through the best route to bring the fiber into your home and place the ONT exactly where it will work best for you.

ONT Setup & Device Connectivity: After installing the ONT, we'll typically use the same username and password as your previous network to ensure all your devices—like laptops, phones, tablets, TVs, gaming consoles, thermostats, and garage openers—connect to Wi-Fi seamlessly. If you'd prefer a new Wi-Fi username and password, our technician will help you set it up and assist with connecting up to 5 Wi-Fi devices you need help with.

Hardwiring & Speed Test: If you'd like, our technician will hardwire equipment to the ONT and show you that you're receiving the speeds you paid for. This doesn't include running any new home cabling, but we'll ensure everything works as expected.

Booster Equipment Limitations: Please note, our technician won't test speeds through your existing Wi-Fi boosters, as we can't guarantee they'll support multi-gig speeds.

Wi-Fi Coverage Test: We'll use a Wi-Fi tool to check the speeds throughout your home. If any areas fall below our acceptable minimum of -65DB, we'll recommend adding a booster to improve coverage.

Booster Recommendations: If needed, our technician will suggest boosters, but we'll also inform you that too many boosters can congest the network and negatively impact Wi-Fi speeds.

Final Check & Satisfaction: Before wrapping up, our technician will ask if you're satisfied with the installation. If there's anything else you need, just let us know.

Clean-Up: Our technician will clean up any mess made during the installation and ensure that all holes are sealed properly. No wires will be left dangling outside.

Continued Support: We'll provide you with our technician's phone number so you can reach out if you have any questions or need assistance in the future—this way, we can avoid unnecessary service visits.

RIPPLE FIBER

Ripple Fiber Service Promise

1. Customer Eligibility Criteria

To qualify for reimbursement:

- Money back guarantee applies for up to 2 months
- Reimbursement excludes installation fees, if paid for by the customer
- Customer must have an active service account
- Issue must be reported within 30 days of activation and Ripple Fiber must be given a chance to resolve it, client must supply the halo ticket reference
- Issue must be documented in Halo with timestamps and resolution attempts
- All resolution attempts must be exhausted
- Customer must explicitly request reimbursement

2. Submission Process

Customers may submit their experience via:

- Email: servicepromise@ripplefiber.com

3. Internal Review & Approval

- Submissions are routed to Halo via the servicepromise@ripplefiber.com inbox
- Assigned to Customer Experience
- Reviewed by Customer Experience leadership
- CSR supervisor should review and provide any direction for resolution prior to being escalated to manager
- CSR supervisor must submit approval to manager which includes
 - Customer name and address
 - Description of the issue
 - Resolution attempt details
 - Requested reimbursement amount
- Approved reimbursements are processed and a check will be sent within 14 days for up to 2 months of service cost only

Reimbursements do not apply to:

- Device connectivity issues
- Issues related to customer-owned equipment
- Outages caused by third-party or external causes
- Service interruptions due to force majeure events (i.e. natural disasters)
- Fraudulent or abusive claims

Contract Buyout Program: Internal Sales & Fulfillment Process

1. Sales Enablement

Sales reps should be trained to use the following pitch when a customer mentions being under contract and reason for not switching:

"We understand switching can be tough. That's why we offer up to \$200 to help buy out your current internet contract. Just send us your final bill to buyouts@ripplefiber.com within 90 days of activation, and we will deduct up to \$50 per month from your bill."

- This offer should be positioned as a limited-time incentive to create urgency
- Reps must note the offer in Sales Rabbit at the time of sale

2. Customer Eligibility Criteria

To qualify for reimbursement:

- The customer must activate service
- Submit a copy of their cancellation bill from the previous provider showing early termination fees (ETFs)
- Submit the bill within 90 days of activation
- The bill must clearly show the customer's name, address, and ETF amount

3. Submission Process

Customers can submit their bill via:

- Email to: buyouts@ripplefiber.com

4. Internal Review & Approval

- buyouts@ripplefiber.com email to create Halo ticket and assign to RF-Buyouts team
- Submissions are reviewed by the Billing team
- Approved reimbursements are logged and processed through the Promo & Discounts portal function
- Reimbursement is issued up to \$50/month Bill credit

5. Tracking & Reporting

Halo dashboard should track:

- Submissions received
- Approvals/denials
- Reimbursement amounts
- Time to resolution

6. Documentation & Compliance

- Ensure all reimbursements are tied to a valid customer account
- Maintain copies of submitted bills within Halo for audit purposes

7. Marketing/sales Material

- Handout for sales reps to provide at the door
- Information to be added to the website
